## Digital-to-Plate

*A laser-powered plate making system produces direct-to-plate digital clarity without chemicals or film.*

*The bench-top sized **Rapid Fire Cliché Maker** comes complete with its own PC and uses a 10 Watt - CO2 laser to etch polymer pad printing plates to depths as needed.*

- ▶ *Special lens allows for extremely fine lines and details including half tones and 4-color process clichés*
- ▶ *No film positives or chemicals required*
- ▶ *Uses laser to etch polymer printing plates*
- ▶ *Extreme precision and repeatability*
- ▶ *Shortens the pre-press process*
- ▶ *Automatic registration for multiple color pad printing applications*
- ▶ *Ideal for shops that need many different plates*
- ▶ *Easy to add new engravings to existing cliches.*

*We supply three different polymer plates for use with the Rapid Fire with estimated lifespan of 10,000 to 100,000 impressions (depending on usage).*

*No subplate required, plates are made with a thin steel backing.*

*Laser etching on plate* ▲

### Specifications

Dimensions	Height: 14" Width: 26" Depth: 25"
Internal work surface	16" x 12" (406 x 305mm)
Weight (depending on optional accessories)	85 to 92 lbs.
Power requirements	110V/10A - 220V

Customer must furnish a 50-100 CFM external venting unit.  
Machine specification are subject to change without notice.
