

# UV-300 Ultraviolet

## Conveyor Oven System

A compact UV-Conveyor Oven System for curing UV inks- both solvent or water based types. It uses a 150mm mercury- incandescent lamp with power up to 300 W.P.I. The lamp assembly has an adjustable holder and a maximum clearance of 6" (150mm) for printed items.

▲ **UV-300**  
- Conveyor Oven System

▲ **Steel mesh conveyor belt**

The **UV-300** features include:

- ▶ High performance / compact design
- ▶ Lamp power regulator
- ▶ Stainless steel conveyor
- ▶ Adjustable height entrance
- ▶ Conveyor speed regulator
- ▶ Equipped with suction fan that can be connected to an air filtering device
- ▶ Unit on wheels for mobility

▲ **Power panel** controls lamp duration counter, power regulator and on/off switches

▲ **Control panel** easy access to key operations

### Specifications

Voltage	380 V
Power	3,5K W
Belt dimension	6' 5" x 1ft
UV lamp arc	150mm
Lamp power	125 - 200 - 300 W.P.I.
Belt speed	0 - 59 ft/min.
Max entrance height	6 inches
Max entrance width	12 inches
Dimensions	W: 2' 7" L: 7ft HT: 5'3"
Weight:	595 lbs / 270kg

*Machine specification are subject to change without notice.*
